New York State Crime Update

David A. Paterson
Governor

Sean M. Byrne
Acting DCJS Commissioner

Crime in New York State *2009 Final Data*

This report and the attached appendices provide the most recent information available on the number of Index crimes and rates per 100,000 population for each county in New York State. County population data are provided every year by the FBI based on U.S. Census estimates and are used to calculate crime rates. Crime counts are based on official crime reports submitted to DCJS through the Uniform Crime Reporting (UCR) and Incident Based Reporting (IBR) programs. Index offenses include the *violent* crimes of murder, forcible rape, robbery and aggravated assault, and the *property* crimes of burglary, larceny, and motor vehicle theft. Because of their seriousness and frequency, these crimes are used by DCJS and the FBI as indicators of overall crime trends.

The summary includes information on crimes reported in New York State for the last 10 years. These figures include all reports received by DCJS as of September 7, 2010. They differ slightly from those published by the FBI; the FBI reports include estimations for agencies with incomplete reporting, and exclude data submitted after FBI deadlines.

Detailed information on crime data for each reporting agency from 2005 through 2009 is available on the DCJS website:
http://criminaljustice.state.ny.us/crimnet/ojsa/indexcrimes/county_totals.htm

New York State has experienced significant declines in both the crime *rate*—or the number of “Index” crimes per capita—and the crime *volume*—the total number of Index crimes reported over the past decade while the population of the state has increased.

Change in Crime Rates: 2000 vs. 2009

Over the past 10 years, the overall rate of Index crimes per 100,000 residents declined 25 percent; the rate of violent crimes (murder, rape, robbery, and aggravated assault) fell 30% and property crimes (burglary, larceny, and motor vehicle theft) were down 24%. The largest reductions in crime rates were reported for motor vehicle theft, robbery, and burglary (see Appendix 1 for a statewide, annualized comparison of crime rates).

Change in Crime Volume: 2000 vs. 2009

While New York State's crime rate has decreased over the past 10 years, New York has also reported a significant reduction in the actual number of crimes reported. The number of major crimes reported fell each year since 2000, reaching the lowest levels ever recorded in 2007 before rising slightly in 2008 and falling again in 2009. There were 135,956 fewer crimes reported in 2009 than in 2000, while the population of the State increased by half a million.

Trends in Regional Crime: 2000 to 2009

Not all areas of the State have benefited equally from the historic reduction in crime. The decline in Index crime in New York City was much larger than that experienced in counties outside of New York City (See Appendix 2).

Given the greater decline in crime in New York City, the proportion of statewide crime that each region accounted for has shifted dramatically. The counties outside New York City now account for 58% of the reported crime statewide, as compared to 50% in 2000 and 37% in 1990.

While a higher proportion of the State's violent crimes occurred in New York City, that region reported a 39% drop in violent crimes since 2000, while the non-New York City counties reported a decrease of 1%. All violent crime categories declined in New York City between 2000 and 2009, while all but assault increased in the Non-New York City region during the same period (See Appendix 2).

Recent Statewide Crime Trends: 2008 vs. 2009

The most recent 2009 crime data show that crime volume in New York State decreased between 2008 and 2009.

**Percentage Change in Crime Volume
2008 vs. 2009**

In 2009, New York State reported an overall drop of 3% in the seven major Index crimes as compared to 2008.

Both violent and property crime categories fell at the same rate (-3%). The only increase was reported in aggravated assaults (3%) while motor vehicle thefts reported the largest decrease (-13%).

Percentage Change in Crime by Region: 2008 vs. 2009

The New York City region reported a 5% decline in Index crimes between 2008 and 2009, while the rest of the State reported a 2% decline (crime counts for 2008 and 2009 are presented for each county in Appendix 3; county crime rates for 2009 are provided in Appendix 4).

New York City

Non-New York City

Trends in Violent Crimes by Firearm: 2000 to 2009

The Uniform Crime Reporting system includes information provided by law enforcement regarding the number of violent crimes reported which involved the use of a firearm. Currently, these figures are only available from the non-New York City region. Over the last 10 years, there has been a general increase in the use of firearms in violent crimes, with the highest count reported in 2006 (6,164 or 19% of violent crimes). In 2009, there were 5,298 reported violent crime incidents which involved a firearm, a decrease of almost 1% over 2008, and an increase of 18% over 2000. Appendix 5 provides counts of firearm related crimes for each of the violent Index crimes.

Appendix 5 shows that during 2009, 181 of 310 murders reported outside of New York City involved a firearm (58%). This was the highest proportion by firearm over the last 10 years, up from 50% in 2000. The number of firearm-related robberies also increased by 8% over 2000, but the proportion by firearm has remained relatively stable at approximately 30%. The number of aggravated assaults fell by 800 between 2000 and 2009, but the number by firearm rose from 1,697 to 2,282 (35%).
