New York State Crime Report

Andrew M. Cuomo Governor

Sean M. Byrne
Acting Commissioner

Crime in New York State 2010 Final Data

This report and the attached appendices provide the most recent information available on the number of Index crimes and rates per 100,000 population for each county in New York State. County population data are provided every year by the FBI based on U.S. Census estimates and are used to calculate crime rates. Crime counts are based on official crime reports submitted to DCIS through the Uniform Crime Reporting (UCR) and Incident Based Reporting (IBR) programs. Index offenses include the *violent* crimes of murder, forcible rape, robbery and aggravated assault, and the property crimes of burglary, larceny, and motor vehicle theft. Because of their seriousness and frequency, these crimes are used by DCJS and the FBI as indicators of overall crime trends.

The summary includes information on crimes reported in New York State for the last 10 years. These figures include all reports received by DCJS as of September 12, 2011. They differ slightly from those published by the FBI; the FBI reports include estimations for agencies with incomplete reporting, and exclude data submitted after FBI deadlines.

Detailed information on crime data for each reporting agency from 2006 through 2010 is available on the DCJS website:

http://criminaljustice.state.ny.us/crimnet/ojsa/indexcrimes/county_totals.htm

New York State has experienced significant declines in both the crime *rate*—or the number of "Index" crimes per capita—and the crime *volume*—the total number of Index crimes reported over the past decade while the population of the state has increased.

Change in Crime Rates: 2001 vs. 2010

Over the past 10 years, the overall rate of Index crimes per 100,000 residents declined 21 percent; the rate of violent crimes (murder, rape, robbery, and aggravated assault) fell 25% and property crimes (burglary, larceny, and motor vehicle theft) were down 20%. The largest reductions in crime rates were reported for motor vehicle theft, and robbery (see Appendix 1 for a statewide, annualized comparison of crime rates).

Percentage Change in Crime Rates 2001 vs. 2010

Change in Crime Volume: 2001 vs. 2010

While New York State's crime rate has decreased over the past 10 years, New York has also reported a significant reduction in the actual number of crimes reported. Index crimes fell each year between 2001 and 2010 with the exception of a slight rise in 2008. The number of major crimes reached the lowest levels ever recorded in 2010, when there were 108,048 fewer crimes reported than in 2001. The State's population increased by approximately 360,000 residents during the same time period.

New York State Index Crime Counts

Trends in Regional Crime: 2001 to 2010

Not all areas of the State have benefited equally from the historic reduction in crime. The decline in Index crime in New York City was much larger than that experienced in counties outside of New York City (See Appendix 2).

Regional Crime as a Percent of Statewide Crime

Given the greater decline in crime in New York City, the proportion of statewide crime that each region accounted for has shifted dramatically. The counties outside New York City now account for 58% of the reported crime statewide, as compared to 50% in 2000 and 37% in 1990.

Regional Trends in Violent Crime

While a higher proportion of the State's violent crimes occurred in New York City, that region reported a nearly 30% drop in violent crimes since 2001, while the non-New York City counties reported a decrease of almost 9%. Both regions report declines in each violent crime category during the last 10 years except for a slight increase in murders in non-New York City (See Appendix 2).

Recent Statewide Crime Trends: 2009 vs. 2010

The most recent 2010 crime data show that crime volume in New York State was relatively unchanged between 2009 and 2010.

Percentage Change in Crime Volume 2009 vs. 2010

In 2010, New York State reported a slight drop of 0.1% in the seven major Index crimes as compared to 2009.

A 1.3% percent increase in violent crime categories was offset by a 0.3% decline in the higher volume property crime categories. Increases were reported in each Index offense except larceny (-0.6%) and motor vehicle theft (-6.4%). Murders rose 10.5% and forcible rapes increased by 7.3%.

Percentage Change in Crime by Region: 2009 vs. 2010

The New York City region reported a 4.6% increase in violent crimes between 2009 and 2010, while the rest of the State reported a 4.1% decline. Alternatively, property crimes dropped 1.7% in New York City and rose slightly (0.5%) in the rest of the State (crime counts for 2009 and 2010 are presented for each county in Appendix 3; county crime rates for 2010 are provided in Appendix 4).

Trends in Violent Crimes by Firearm: 2001 to 2010

The Uniform Crime Reporting system includes information provided by law enforcement regarding the number of violent crimes reported which involved the use of a firearm. Currently, these figures are only available from the non-New York City region. Over the last 10 vears, there has been a general increase in the use of firearms in violent crimes, with the highest count reported in 2006 (6,164 or 19% of violent crimes). In 2010, there were 5,078 reported violent crime incidents which involved a firearm, a decrease of 4% over 2009, and an increase of 4% over 2001. Appendix 5 provides counts of firearm related crimes for each of the violent Index

Violent Crimes by Firearm: Non-New York City

Appendix 5 shows that during 2010, 200 of 329 murders reported outside of New York City involved a firearm (61%). This was the highest proportion by firearm over the last 10 years, up from 53% in 2001. The number of firearm-related robberies decreased by 10% over 2001, but the proportion by firearm has remained relatively stable at approximately 30%. The number of aggravated assaults fell by 1,764 between 2001 and 2010, but the number by firearm rose from 1,839 to 2,330 (+27%).
